Section 2: EX-99.1 (EXHIBIT 99.1)

FGL Holdings Reports Second Quarter 2018 Results

GEORGE TOWN, Cayman Islands: August 8, 2018 - FGL Holdings (NYSE: FG), a leading provider of annuities and life insurance, today announced financial results for the second quarter of 2018.

- **Net income available to common shareholders of \$13 million or \$0.06 per share**
- **Adjusted operating income (AOI)¹ available to common shareholders of \$58 million or \$0.27 per share**
- **Total annuity sales of \$769 million, a 32 percent increase and fixed indexed annuities (FIAs) sales of \$549 million, a 21 percent increase**
- **Average assets under management of \$25.2 billion; including \$1.4B of net asset flows year over year**

"We delivered another strong quarter with a 38 percent increase in adjusted operating income along with substantial increases in sales and assets under management, and are on target for the sales and earnings outlook we provided earlier this year," said Chris Littlefield, President and CEO of FGL Holdings. "We remain disciplined in delivering growth that meets profitability targets, and we have good momentum with our distribution partners who have increased confidence in our financial strength, commitment to growth and product offerings. We are also seeing early traction in our International flow reinsurance business. During the quarter, we completed a \$550 million debt offering which allowed us to refinance our outstanding debt at lower rates and to augment our capital. Our solid capital position, coupled with our strong sponsorship, affords us flexibility to pursue growth through acquisitions or reinsurance transactions if accretive opportunities arise. Finally, we're making good progress on the investment front as we continue to improve our overall portfolio yield."

As a result of acquisition accounting (purchase accounting or PGAAP), financial results for periods after the closing of the merger transaction on November 30, 2017 are generally not comparable to the results of prior periods. Certain metrics, such as sales and policyholder account values, are not affected by PGAAP and are comparable to prior period data. The Company presents the tables and financial results herein as follows:

- *Fidelity & Guaranty Life (FGL) (the Predecessor Company)--November 30, 2017 & prior periods*
- *FG (the Successor Company)--December 1, 2017 and subsequent periods*

The table below reconciles reported after-tax net income to adjusted operating income (AOI) available to common shareholders.

(In millions)

	Three Months Ended

	(Unaudited)	(Unaudited)
Reconciliation from Net Income to AOI⁽¹⁾:		

Net income	\$ 20	\$ 32
Effect of investment losses (gains), net of offsets ⁽²⁾	37	4
Effect of changes in fair values of FIA related derivatives, net of offsets ^{(2) (3)}	16	(4)
Effect of change in fair value of reinsurance related embedded derivative, net of offsets ⁽⁴⁾	—	8
Effect of integration, merger related & other non-operating items	3	5
Effects of extinguishment of debt	(2)	—
Tax impact of adjusting items	(9)	(3)
AOI ⁽¹⁾	\$ 65	\$ 42
Dividends on preferred stock ⁽⁵⁾	(7)	—
AOI available to common shareholders ⁽¹⁾	\$ 58	\$ 42

The current quarter included net notable items of \$6 million, or \$0.03 per diluted share available to common shareholders. The prior year quarter included net notable items of \$1 million, or \$0.02 per diluted share. All periods reflect the weighted average diluted shares then outstanding. The table below details notable items in each period.

Current Year Quarter (FG)

- Favorable actual to expected mortality within the single premium immediate annuity (SPIA) product line and other annuity reserve movements \$5 million
- Favorable net investment income from bond prepayment income \$4 million
- Higher project related expenses (\$3) million

Prior Year Quarter (FGL)

- Favorable actual to expected mortality within the SPIA product line and other annuity reserve movements \$2 million
- Higher expense related to legacy compensation plans (\$1) million

See footnotes below.

Sales Results

Total annuity sales were \$769 million for the second quarter, an increase of 32 percent compared to the second quarter of 2017. On a year-to-date basis, total annuity sales of \$1.5 billion increased 18 percent over the prior year period. At the half year mark, the Company is well on track to achieve and potentially exceed the Company's targeted growth of 10 to 12 percent for annuity sales.

Sales of the Company's core fixed indexed annuity (FIA) product in the current quarter were \$549 million, an increase of 21 percent compared to \$455 million in the prior year period. FIA sales increased 26 percent compared to the first quarter of 2018. The strong sales growth reflects long-tenured and productive relationships with key distribution partners, their increasing confidence in the Company and their returned focus on sales and marketing activities now that the Department of Labor (DOL) rule has been vacated. Additionally, in February the Company successfully launched a new performance-based income and accumulation product series, which accounted for 12 percent of FIA sales in the quarter. FIA sales were \$985 million on a year-to-date basis, an increase of 10 percent over the prior year period.

Sales of multi-year guarantee annuities (MYGA) were \$220 million in the current quarter, as compared to \$127 million in the same period last year. Sales increases were driven by strong market positioning through the strength of distribution partnerships and supported by enhanced asset sourcing capabilities.

Indexed universal life (IUL) sales in the quarter were \$7 million compared to \$9 million last year. The decline in IUL sales reflects the Company's focus on quality of new business and pricing discipline to achieve profitability and capital targets. The Company is focused on improving IUL growth momentum particularly following an upgrade to its ratings.

Investment Portfolio Performance

The investment portfolio is performing well and in line with operating objectives. Asset purchases during the second quarter were \$1.5 billion at an average yield⁽⁷⁾ of 5.65 percent. Asset purchases were primarily in structured securities including CMBS, CLO, ABS and RMBS. Overall, the average NAIC rating for the portfolio is stable at approximately 1.5. The Company's portfolio repositioning is making good progress in shifting from corporate to structured securities and building the alternative asset portfolio, with significant additional actions slated to occur throughout the second half of 2018.

Average assets under management (AAUM) were \$25.2 billion at June 30, 2018 on a year-to-date basis, reflecting an increase of \$257 million over the sequential quarter. AAUM increased \$4.8 billion compared to the prior year period due to \$1.4 billion net new business asset flows, as well as the mark-to-market valuation of the investment portfolio as of the date of the merger of \$1.2 billion, and the inclusion of \$1.9 billion acquired AAUM in Front Street Re and FGL Holdings. A roll forward of AAUM can be found in the non-GAAP measurements section of this release.

Net investment income was \$282 million in the second quarter of 2018, up \$25 million or 10 percent from the prior year quarter. Net investment income grew from higher AAUM and bond prepay income, partially offset by approximately \$18 million of premium amortization resulting from the fair value mark on the investment portfolio at merger transaction close. Net investment income was up \$19 million or 7 percent from the first quarter of 2018, due to volume growth and \$9 million from the \$2.7 billion block trade completed in late February. The average earned yield on the total portfolio was 4.42 percent in the current quarter.

Net investment spread across all product lines was 208 basis points in the second quarter of 2018 compared to 254 basis points in the prior year period. Spread trends reflect the decline in portfolio yield due to purchase accounting effects and are otherwise stable. Net investment spread for all products was up 20 basis points on a sequential basis due to the lift in net investment income over the prior quarter noted above. Net investment spread for fixed indexed annuities declined from 302 basis points in the second quarter 2017 to 254 basis points in the second quarter of 2018 due to lower yield from purchase accounting. On a Statutory or economic basis, the yield on the investment portfolio remains above 5 percent. The Company expects the overall portfolio yields on both a GAAP and a Statutory basis to continue to expand from ongoing portfolio repositioning efforts. Net realized losses on available-for-sale securities were \$46 million in the quarter before amortization and taxes, primarily from \$20 million portfolio repositioning and \$23 million market value changes on preferred equity securities. There were no impairment losses in the current quarter.

Capital Management

- GAAP book value per common share at June 30, 2018 was \$4.42 on a reported basis; book value per common share excluding accumulated other comprehensive income (AOCI) was \$7.23, with 214.4 million common shares outstanding as of June 30, 2018.
- The Company continues to have a strong and stable capital position, with an estimated Statutory company action level risk-based capital (RBC) on an aggregate basis of 485 percent as of June 30, 2018, including impacts of Tax Reform.
- During the quarter, the Company closed on \$550 million aggregate principal amount of 5.50% senior notes due 2025. The Company used the net proceeds to repay \$135 million borrowings under its revolving credit facility, related expenses and to redeem and discharge all of the outstanding \$300 million aggregate principal amount of its outstanding 6.375% Senior Notes due 2021. The Company contributed the remaining additional capital to its insurance subsidiaries.

Accounting Matters

During the quarter ended June 30, 2018, the Company's management identified a deficiency in the design of a control over the completeness of the population of securities to be evaluated for the appropriate classification as debt or equity securities under ASC 320.

The control deficiency did not result in a material misstatement of the Company's previously issued financial statements.

The Company has made immaterial corrections of certain amounts in the consolidated balance sheet as of December 31, 2017 as well as including an immaterial out-of-period amount in the three months ended June 30, 2018. Management has concluded the deficiency constituted a material weakness in internal control over financial reporting during the quarters ended March 31, 2018 and June 30, 2018 and the period ended December 31, 2017.

The reclassification had no impact on the Company's Adjusted Operating Income in any period.

Conference Call and Earnings Release

This press release and the financial supplement will be posted to the Company's website at investors.fglife.bm.

FGL Holdings will conduct a conference call on Thursday, August 9, 2018 at 9:00 a.m. ET to discuss second quarter 2018 results.

The event can be accessed the following ways:

- For internet webcast, visit investors.fglife.bm/investors at least 15 minutes prior to the start of the call to register.
- For conference call, dial 877-883-0383 (U.S. callers) or 412-902-6506 (International callers) approximately 10 minutes prior to the start of the call. The access code is 5420443.
- A replay of the event via webcast will be available after the call at investors.fglife.bm/investors.
- A replay of the event via telephone will be available by dialing 877-344-7529 (U.S. callers) or 412-317-0088 (International callers). The access code is 10121947.

The replay information will be available through August 30, 2018.

- (1) Non-GAAP financial measure. See the Non-GAAP Measures section below for additional information.
- (2) Amounts are net of offsets related to value of business acquired (VOBA), deferred acquisition cost (DAC) and deferred sale inducement (DSI) amortization.
- (3) The Company adjusted its non-GAAP measure to remove the residual impacts of fair value accounting on its FIA products, for periods after December 31, 2017.
- (4) Applicable to the Predecessor only due to the merger.
- (5) Applicable to the Successor only.
- (6) Predecessor share counts reflect those of the Predecessor entity prior to the merger.
- (7) Average yield reflects investment book yield on bonds purchased during the quarter. See the Non-GAAP Measures section below for additional information.

Purchase Accounting

On November 30, 2017, Fidelity & Guaranty Life completed its merger transaction with CF Corp, emerging as FGL Holdings. As of the merger date, the Company applied the acquisition method of accounting (purchase accounting or PGAAP), including the initial recognition of most of FGL's and Front Street Re assets and liabilities at fair value, and the recognition of goodwill and other merger-related intangible assets. Prior period results are not restated for the new basis of accounting, which is used in the preparation of future financial statements and related disclosures.

Non-GAAP Measures

Management believes that certain non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Reconciliations of such measures to the most comparable GAAP measures are included herein.

The Company updated its AOI definition as to remove the residual impacts of fair value accounting on its FIA products, including gains and losses on derivatives hedging those policies. Management believes the revised measure enhances the understanding of the business post-merger and is more useful and relevant to investors as compared to the previous definition which eliminated only the effects of changes in the interest rates used to discount the FIA embedded derivative.

AOI is a non-GAAP economic measure we use to evaluate financial performance each period. AOI is calculated by adjusting net income (loss) to eliminate (i) the impact of net investment gains/losses including other than temporary impairment ("OTTI") losses recognized in operations, but excluding gains and losses on derivatives hedging our indexed annuity policies, (ii) the effect of changes in fair values of FIA related derivatives and embedded derivatives, net of hedging cost, (iii) the tax effect of affiliated reinsurance embedded derivative, (iv) the effect of integration, merger related & other non-operating items, (v) impact of extinguishment of debt, and (vi) net impact from Tax Cuts and Jobs Act. Adjustments to AOI are net of the corresponding impact on amortization of intangibles, as appropriate. The income tax impact related to these adjustments is measured using an effective tax rate of 21%, as appropriate. While these adjustments are an integral part of the overall performance of the Company, market conditions and/or the non-operating nature of these items can overshadow the underlying performance of the core business. Accordingly, Management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations.

AOI available to common shareholders is a non-GAAP economic measure we use to evaluate financial performance attributable to our common shareholders each period. AOI available to common shareholders is calculated by adjusting net income (loss) available to common shareholders to eliminate (i) the impact of net investment gains including other than temporary impairment ("OTTI") losses recognized in operations, but excluding gains and losses on derivatives hedging our indexed annuity policies, (ii) the effect of changes in fair values of FIA related derivatives and embedded derivatives, net of hedging cost, (iii) the tax effect of affiliated reinsurance embedded derivative, (iv) the effect of integration, merger related & other non-operating items, (v) impact of extinguishment of debt, and (vi) net impact from Tax Cuts and Jobs act. Adjustments to AOI available to common shareholders are net of the corresponding impact on amortization of intangibles, as appropriate. The income tax impact related to these adjustments is measured using an effective tax rate of 21%, as appropriate. While these adjustments are an integral part of the overall performance of the Company, market conditions impacting these items can overshadow the underlying performance of the business. Accordingly, Management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations. Our non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do.

Adjusted Operating Return on Common Shareholders' Equity Excluding AOCI is a non-GAAP financial measure. It is calculated by dividing AOI Available to Common Shareholders' by total average Common Shareholders' Equity Excluding AOCI. Average Common Shareholders' Equity Excluding AOCI for the twelve months rolling, is the average of 5 points throughout the period and for the quarterly average Common Shareholders' Equity is calculated using the beginning and ending Common Shareholders Equity, Excluding AOCI, for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. As a result of the merger, the starting point for calculation of average Common Shareholders' Equity was reset to December 1, 2017. The rolling average will be updated from the merger date forward to use available historical data points for the successor until 5 historical data points are available. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, Management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of adjusted earned return on common equity.

Net investment spread is the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on FIA policies. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the performance of the Company's invested assets against the level of investment return, inclusive of hedging costs, provided to policyholders.

AAUM is the sum of (i) total invested assets at amortized cost, excluding derivatives; (ii) related party loans and investments; (iii) accrued investment income; (iv) funds withheld at fair value; (v) the net payable/receivable for the purchase/sale of investments and (iv) cash and cash equivalents, excluding derivative collateral, at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one. Management considers this non-GAAP financial measure to be useful supplemental information internally and to investors and analysts when assessing the rate of return on assets available for reinvestment.

Investment book yield on bonds purchased during the period excludes yield on short-term treasuries and cash and cash equivalents. The Predecessor considered this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of returned on their income generating invested assets.

Common Shareholders' Equity is based on Total Shareholders' Equity excluding Equity Available to Preferred Shareholders. Management considers this to be a useful measure internally and to investors to assess the level of equity that is attributable common stock holders.

Common Shareholders' Equity Excluding AOCI is based on Common Shareholders Equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, Management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of earned equity on common equity.

Book Value per Common Share including and excluding AOCI is calculated as Common Shareholders' Equity and Common Shareholders Equity Excluding AOCI divided by the total number of shares of common stock outstanding. Management considers this to be a useful measure internally and for investors and analysts to assess the capital position of the Company.

Sales are not derived from any specific GAAP income statement accounts or line items and should not be viewed as a substitute for any financial measure determined in accordance with GAAP. For GAAP purposes annuity and IUL sales are recorded as deposit liabilities (i.e. contract holder funds). Management believes that presentation of sales as measured for management purposes enhances the understanding of our business and helps depict longer term trends that may not be apparent in the results of operations due to the timing of sales and revenue recognition.

While management believes that non-GAAP measurements are useful supplemental information, such adjusted results are not intended to replace GAAP financial results and should be read in conjunction with those GAAP results.

About FGL Holdings

FGL Holdings, an insurance holding company, helps middle-income Americans prepare for retirement. Through its subsidiaries, the company is a leading provider of annuity and life insurance products. FGL Holdings, domiciled in the Cayman Islands, trades on the New York Stock Exchange under the ticker symbol FG. For more information, please visit www.fglife.bm.

Forward Looking Statements

"Safe Harbor" Statement Under the Private Securities Litigation Reform Act of 1995: This document contains, and certain oral statements made by our representatives from time to time may contain, forward-looking statements. Such statements are subject to risks and uncertainties that could cause actual results, events and developments to differ materially from those set forth in, or implied by, such statements. These statements are based on the beliefs and assumptions of FG's management and the management of FG's subsidiaries (including target businesses). Forward-looking statements are generally identifiable by use of the words "believes," "expects," "intends," "anticipates," "plans," "seeks," "estimates," "projects," "may," "will," "could," "might," or "continues" or similar expressions. Factors that could cause actual results, events and developments to differ include, without limitation: the accuracy of FG's assumptions and estimates; FG's and its insurance subsidiaries' ability to maintain or improve financial strength ratings; FG's ability to manage its business in a highly regulated industry; regulatory changes or actions; the impact of FG's reinsurers failing to meet their assumed obligations; restrictions on FG's ability to use captive reinsurers; the impact of interest rate fluctuations; changes in the federal income tax laws and regulations; litigation (including class action litigation), enforcement investigations or regulatory scrutiny; the performance of third parties; the loss of key personnel; telecommunication, information technology and other operational systems failures; the continued availability of capital; new accounting rules or changes to existing accounting rules; general economic conditions; FG's ability to protect its intellectual property; the ability to maintain or obtain approval of the Iowa Insurance Department and other regulatory authorities as required for FG's operations; FG's ability to successfully acquire new companies and integrate such acquisitions; and other factors discussed in FG's most recent Annual Report on Form 10-K for the year ended December 31, 2017, and its Quarterly Reports on Form 10-Q, which can be found at the SEC's website www.sec.gov.

All forward-looking statements described herein are qualified by these cautionary statements and there can be no assurance that the actual results, events or developments referenced herein will occur or be realized. FG does not undertake any obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operation results, except as required by law.

Exhibit 99.2

Investor Supplement
June 30, 2018
(Year Ended December 31)

The financial statements and financial exhibits included herein are unaudited. These financial statements and exhibits should be read in conjunction with the Company's periodic reports on Form 10-K, Form 10-Q and Form 8-K.

Fidelity & Guaranty Life ("FGL"; NYSE: FGL), a former majority owned subsidiary of HRG Group, Inc. ("HRG"; NYSE: HRG), completed the merger with CF Corporation (NASDAQ: CFCO) ("CF Corp") and its related entities ("CF Entities"), on November 30, 2017 ("Closing Date"). As a result of the Business Combination completed November 30, 2017, CF Corp changed their name to FGL Holdings (NYSE: FG). For accounting purposes, FGL Holdings was determined to be the acquirer and FGL was deemed the acquired party and accounting predecessor. In addition, on November 30, 2017 CF Corp acquired all of the issued and outstanding shares of Front Street Re (Cayman) Ltd. and Front Street Re. Ltd (collectively "FSR Companies"). Our financial statement presentation includes the financial statements of FGL and its subsidiaries as "Predecessor" for the periods prior to the completion of the Business Combination and FGL Holdings, including the consolidation of FGL and its subsidiaries and FSR Companies, as "Successor" for periods from and after the Closing Date.

Non-GAAP Financial Measures

This document contains certain non-GAAP financial measures commonly used in our industry that, together with the relevant GAAP measures, may enhance a user's ability to analyze the Company's operating performance and capital position for the periods presented. These measures should be considered supplementary to our results in accordance with GAAP and should not be viewed as a substitute for the GAAP measures.

NON-GAAP FINANCIAL MEASURES : Successor

While management believes that non-GAAP measurements are useful supplemental information, such adjusted results are not intended to replace GAAP financial results and should be read in conjunction with those GAAP results.

AOI

AOI is a non-GAAP economic measure we use to evaluate financial performance each period. AOI is calculated by adjusting net income (loss) to eliminate (i) the impact of net investment gains/losses including other than temporary impairment ("OTTI") losses recognized in operations, but excluding gains and losses on derivatives hedging our indexed annuity policies, (ii) the effect of changes in fair values of FIA related derivatives and embedded derivatives, net of hedging cost, (iii) the tax effect of affiliated reinsurance embedded derivative, (iv) the effect of integration, merger related & other non-operating items, (v) impact of extinguishment of debt, and (vi) net impact from Tax Cuts and Jobs Act. Adjustments to AOI are net of the corresponding impact on amortization of intangibles, as appropriate. The income tax impact related to these adjustments is measured using an effective tax rate of 21%, as appropriate. While these adjustments are an integral part of the overall performance of the Company, market conditions and/or the non-operating nature of these items can overshadow the underlying performance of the core business. Accordingly, Management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations. Beginning with the quarter ended March 31, 2018, the Company updated its AOI definition to remove the residual impacts of fair value accounting on its FIA products, including gains and losses on derivatives hedging those policies. Management believes the revised measure enhances the understanding of the business post-merger and is more useful and relevant to investors as compared to the previous definition which eliminated only the effects of changes in the interest rates used to discount the FIA embedded derivative. Periods shown prior to March 31, 2018 have not been adjusted to reflect the new definition.

AOI Available to Common Shareholders

AOI available to common shareholders is a non-GAAP economic measure we use to evaluate financial performance attributable to our common shareholders each period. AOI available to common shareholders is calculated by adjusting net income (loss) available to common shareholders to eliminate (i) the impact of net investment gains including other than temporary impairment ("OTTI") losses recognized in operations, but excluding gains and losses on derivatives hedging our indexed annuity policies, (ii) the effect of changes in fair values of FIA related derivatives and embedded derivatives, net of hedging cost, (iii) the tax effect of affiliated reinsurance embedded derivative, (iv) the effect of integration, merger related & other non-operating items, (v) impact of extinguishment of debt, and (vi) net impact from Tax Cuts and Jobs act. Adjustments to AOI available to common shareholders are net of the corresponding impact on amortization of intangibles, as appropriate. The income tax impact related to these adjustments is measured using an effective tax rate of 21%, as appropriate. While these adjustments are an integral part of the overall performance of the Company, market conditions impacting these items can overshadow the underlying performance of the business. Accordingly, Management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations. Our non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do.

Common Shareholders' Equity

Common Shareholders' Equity is based on Total Shareholders' Equity excluding Equity Available to Preferred Shareholders. Management considers this to be a useful measure internally and to investors to assess the level of equity that is attributable common stock holders.

Common Shareholders' Equity Excluding AOCI

Common Shareholders' Equity Excluding AOCI is based on Common Shareholders Equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, Management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of earned equity on common equity.

FGL HOLDINGS

Financial Supplement - June 30, 2018

(unaudited)

Equity Available to Preferred Shareholders

Equity available to preferred shareholders is equal to the product of (a) the number of preferred shares outstanding plus share dividends declared but not yet issued and (b) the original liquidation preference amount per share. Management considers this non-GAAP measure to provide useful supplemental information internally and to investors and analysts to assess the level of equity that is attributable to preferred stock holders.

Total Capitalization Excluding AOCI

Total Capitalization Excluding AOCI is based on shareholders' equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, Management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts to help assess the capital position of the Company.

Book Value per Common Share (including and excluding AOCI)

Book Value per Common Share including and excluding AOCI is calculated as Common Shareholders' Equity and Common Shareholders Equity Excluding AOCI divided by the total number of shares of common stock outstanding. Management considers this to be a useful measure internally and for investors and analysts to assess the capital position of the Company.

Statutory Book Value per Common Share (including and excluding Interest maintenance reserve ("IMR") and asset valuation reserve ("AVR"))

Statutory Book Value per Common Share including IMR and AVR is calculated as Fidelity & Guaranty Life Insurance Company ("FGLIC")'s statutory basis capital and surplus plus F&G Re's U.S. GAAP Common Shareholders' Equity excluding the impact of reinsurance embedded derivatives and AOCI, plus FSRC's U.S. GAAP Common Shareholders' Equity excluding AOCI divided by the total number of shares of common stock outstanding at FGL Holdings. Statutory Book Value per Common Share excluding IMR and AVR is calculated as FGLIC's statutory basis capital and surplus excluding IMR and AVR plus F&G Re's U.S. GAAP Common Shareholders' Equity excluding the impact of reinsurance embedded derivatives and AOCI, plus FSRC's U.S. GAAP Common Shareholders' Equity excluding AOCI divided by the total number of shares of common stock outstanding at FGL Holdings. Management considers this to be a useful measure internally and for investors and analysts to assess the capital position of our primary insurance entities.

Return on Common Shareholders' Equity

Return on Common Shareholders' Equity is a non-GAAP financial measure. It is calculated by dividing net income (loss) available to common shareholders by total average Common Shareholders' Equity. Average Common Shareholders Equity for the twelve months rolling, is the average of five points throughout the period and for the quarterly average Common Shareholders Equity is calculated using the beginning and ending Common Shareholders' Equity for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. As a result of the merger, the starting point for calculation of average Common Shareholders' Equity was reset to December 1, 2017. The rolling average will be updated from the merger date forward to use available historical data points for the successor until 5 historical data points are available. Management considers this to be a useful measure internally and for investors and analysts to assess the level of return driven by the Company that is attributable to common shareholders.

Return on Common Shareholders Equity Excluding AOCI

Return on Common Shareholders' Equity Excluding AOCI is a non-GAAP financial measure. It is calculated by dividing net income (loss) available to common shareholders by total average Common Shareholders' Equity Excluding AOCI. Average Common Shareholders Equity Excluding AOCI for the twelve months rolling, is the average of 5 points throughout the period and for the quarterly average Common Shareholders Equity Excluding AOCI is calculated using the beginning and ending Common Shareholders' Equity, excluding AOCI, for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. As a result of the merger, the starting point for calculation of average Common Shareholders' Equity was reset to December 1, 2017. The rolling average will be updated from the merger date forward to use available historical data points for the successor until 5 historical data points are available. Management considers this to be a useful measure internally and for investors and analysts to assess the level of return driven by the Company that is attributable to common shareholders.

FGL HOLDINGS

Financial Supplement - June 30, 2018

(unaudited)

Adjusted Operating Return on Common Shareholders' Equity Excluding AOCI

Adjusted Operating Return on Common Shareholders' Equity Excluding AOCI is a non-GAAP financial measure. It is calculated by dividing AOI Available to Common Shareholders' by total average Common Shareholders' Equity Excluding AOCI. Average Common Shareholders' Equity Excluding AOCI for the twelve months rolling, is the average of 5 points throughout the period and for the quarterly average Common Shareholders' Equity is calculated using the beginning and ending Common Shareholders Equity, Excluding AOCI, for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. As a result of the merger, the starting point for calculation of average Common Shareholders' Equity was reset to December 1, 2017. The rolling average will be updated from the merger date forward to use available historical data points for the successor until 5 historical data points are available. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, Management considers this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of adjusted earned return on common equity.

Debt-to-Capital excluding AOCI

Debt-to-capital ratio is computed by dividing total debt by total capitalization excluding AOCI. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing its capital position.

Rating Agency Adjusted Debt to Capitalization, excluding AOCI

Rating Agency Adjusted Debt to Capitalization, excluding AOCI is computed by dividing the sum of total debt and 50% Equity Available to Preferred Shareholders by total capitalization excluding AOCI less a 50% credit for Equity Available to Preferred Shareholders. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing its capital position.

Average Assets Under Management (AAUM)

AAUM is the sum of (i) total invested assets at amortized cost, excluding derivatives; (ii) related party loans and investments; (iii) accrued investment income; (iv) funds withheld at fair value; (v) the net payable/receivable for the purchase/sale of investments and (iv) cash and cash equivalents, excluding derivative collateral, at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one. Management considers this non-GAAP financial measure to be useful supplemental information internally and to investors and analysts when assessing the rate of return on assets available for reinvestment.

Yield on AAUM

Yield on AAUM is calculated by dividing annualized net investment income by AAUM. Management considers this non-GAAP financial measure to be useful supplemental information internally and to investors and analysts when assessing the level of return earned on AAUM.

Net Investment Spread

Net investment spread is the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on FIA policies. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the performance of the Company's invested assets against the level of investment return, inclusive of hedging costs, provided to policyholders.

Investment Book Yield

Investment book yield on bonds purchased during the period excludes yield on short-term treasuries and cash and cash equivalents. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return on the Company's income generating invested assets.

NON-GAAP FINANCIAL MEASURES : Predecessor

The following represents the definitions of non-GAAP measures used by the Predecessor entity.

For the period ended November 30, 2017, the Predecessor changed their definition of AOI to exclude the effects of integration and merger related expenses due to the volume of integration and merger expenses incurred during the two months ended November 30, 2017. Predecessor management believed the exclusion of these charges provided users of the financial statements a more representative view of the results of the core business of the Predecessor for that period. Predecessor periods shown prior to November 30, 2017 have been adjusted to reflect the new definition.

AOI

AOI is a non-GAAP economic measure the Predecessor used to evaluate financial performance each period. AOI is calculated by adjusting net income to eliminate (i) the impact of net investment gains including other than temporary impairment ("OTTI") losses recognized in operations, but excluding gains and losses on derivatives hedging indexed annuity policies, (ii) the effect of changes in the interest rates used to discount the FIA embedded derivative liability, (iii) the effect of change in fair value of the reinsurance related embedded derivative and (iv) the effect of integration and merger related expenses. All adjustments to AOI are net of the corresponding VOBA and DAC impact. The income tax impact related to these adjustments is measured using an effective tax rate of 35%, as appropriate. While these adjustments were an integral part of the overall performance of the Predecessor, market conditions impacting these items could overshadow the underlying performance of the Predecessor's business. Accordingly, the Predecessor believed using a measure which excluded their impact was effective in analyzing the trends of their operations. The Predecessor's non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner.

Total Capitalization Excluding AOCI

Total Capitalization Excluding AOCI is based on shareholders' equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, the Predecessor considered this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts to help assess capital position of the Predecessor.

Book Value per share (including and excluding AOCI) (presented herein as Book Value per common share including and excluding AOCI)

Book Value per share including and excluding AOCI is calculated as shareholders' equity and shareholders' equity excluding AOCI divided by the total number of shares of common stock outstanding. The Predecessor considered this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts to help assess capital position of the Predecessor.

Return on Average Shareholders' Equity (presented herein as Return on Average Common Shareholders' Equity)

Return on Average Shareholders' Equity is a non-GAAP financial measure. It is calculated by dividing net income (loss) available to shareholders by total average shareholders' equity. Average shareholders' equity for the twelve months rolling, is the average of five points throughout the period and for the quarterly average shareholders' equity is calculated using the beginning and ending shareholders' equity for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. The Predecessor considered this to be a useful measure internally and for investors and analysts to assess the level of return driven by the Company that is attributable to common shareholders.

Return on Average Shareholders' Equity Excluding AOCI (presented herein as Return on Average Common Shareholders' Equity Excluding AOCI)

Return on Average Shareholders' Equity Excluding AOCI is a non-GAAP financial measure. It is calculated by dividing net income (loss) available to common shareholders by total average shareholders' equity excluding AOCI. Average shareholders' equity excluding AOCI for the twelve months rolling, is the average of 5 points throughout the period and for the quarterly average shareholders' equity excluding AOCI is calculated using the beginning and ending shareholders' equity, excluding AOCI, for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, the Predecessor considered this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of earned return on shareholders' equity.

FGL HOLDINGS

Financial Supplement - June 30, 2018

(unaudited)

Adjusted Operating Return Equity Excluding AOCI (presented herein as Adjusting Operating return on common shareholders' equity, excluding AOCI)

Adjusted Operating Return on Equity Excluding AOCI is a non-GAAP financial measure. It is calculated by dividing AOI by total average shareholders' equity excluding AOCI. Average shareholders' equity excluding AOCI for the twelve months rolling, is the average of five points throughout the period and for the quarterly average shareholders' equity is calculated using the beginning and ending shareholders' equity, excluding AOCI, for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized. The Predecessor considered this non-GAAP financial measure to provide useful supplemental information internally and to investors and analysts assessing the level of adjusted earned return on equity.

Total Debt to Capitalization, excluding AOCI

Total Debt to Capitalization, excluding AOCI is computed by dividing total debt by total capitalization excluding AOCI. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing its capital position.

Rating Agency Adjusted Debt to Capitalization, excluding AOCI

Rating Agency Adjusted Debt to Capitalization, excluding AOCI is computed by dividing the sum of total debt and 50% preferred equity by total capitalization excluding AOCI less a 50% preferred equity credit. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing its capital position.

Average Assets Under Management (AAUM)

AAUM is the sum of (i) total invested assets at amortized cost, excluding derivatives; (ii) related party loans and investments; and (iii) cash and cash equivalents, excluding derivative collateral, at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one. The Predecessor considered this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the rate of return on assets available for reinvestment.

Yield on AAUM

Yield on AAUM is calculated by dividing annualized net investment income by AAUM. The Predecessor considered this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return earned on AAUM.

Net Investment Spread

Net investment spread is the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging the Predecessor's risk on FIA policies. The Predecessor considered this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the performance of the Predecessor's invested assets against the level of investment return, inclusive of hedging costs, provided to policyholders.

Investment Book Yield

Investment book yield on bonds purchased during the period excludes yield on short-term treasuries and cash and cash equivalents. The Predecessor considered this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of returned on their income generating invested assets.

(1) Refer to "Non-GAAP Financial Measures" for further details

(a) Contractholder funds include amounts on deposit for annuity and universal life contracts plus the fair value of future index credits and guarantees on our FIA and IUL products.

(b) Future policy benefits include the present value of future benefits on our traditional life insurance products and life contingent SPIA contracts.

(c) Liability for policy and contract claims represents policyholder pending claims.

(d) Funds withheld for reinsurance liabilities are collapsed into "Other liabilities" beginning with December 31, 2017, as the amount became immaterial for individual presentation following the merger.

Tax impact of adjusting items	(0.04)	—	(0.02)	(0.06)	(0.02)	(0.05)	(0.04)	(0.17)	
AOI available to common shareholders per diluted share	\$ 0.27	\$ 0.28	\$ —	\$ 0.62	\$ 1.11	\$ 0.72	\$ 0.55	\$ 1.37	

(a) Amounts are net of offsets related to value of business acquired ("VOBA"), deferred acquisition cost ("DAC") and deferred sale inducement ("DSI") amortization.

(b) The updated definition of AOI removes the impact of fair value accounting on FIA products for periods after December 31, 2017.

(c) Adjustment is not applicable subsequent to the Business Combination as the reinsurance agreement and related activity are eliminated via consolidation for U.S. GAAP reporting.

Summary of Adjustments to Arrive at AOI

Increase (decrease) in net income	\$ 45	\$ 16	\$ 105	\$ 8	\$ 4	\$ 10	\$ 61	\$ 26	

(a) Insurance and investment product fees and other: includes the effect of contract fee termination.

(b) Net investment gains: includes the effect of net investment gains including OTTI, changes in fair values of FIA related derivatives and embedded derivatives, net of hedging costs. For the Predecessor, effects of net investment gains include the change in fair value of the reinsurance related embedded derivative.

(c) Benefits and other changes in policy reserves: includes the effects of the changes in fair values of FIA embedded derivatives

(d) Amortization of intangibles includes the impact on DAC, VOBA, and DSI of the adjustments in b-c above.

(e) The tax expense (benefit) includes the tax impact of the adjustments in a-d above, and for the Successor only, the impact of tax reform and the impact of affiliated reinsurance embedded derivative.

Notable Items Included in Net Income and AOI

Each quarterly reporting period, we identify notable items that help explain the trends in our Net Income and AOI. The amounts below are included in disclosures within the Company's earnings releases to explain our Net Income and AOI results as we believe these items provide further clarity to the financial performance of the business.

	Three Months Ended	Three Months Ended	One Month Ended	Two Months Ended	Three Months Ended		Six Months Ended	
	June 30, 2018	March 31, 2018	December 31, 2017	November 30, 2017	September 30, 2017	June 30, 2017	June 30, 2018	June 30, 2017

	(Unaudited)	(Unaudited)	(Unaudited)	(Unaudited)	(Unaudited)	(Unaudited)	(Unaudited)	(Unaudited)
	(Dollars in millions)							
Net income	\$ 20	\$ 52	\$ (102)	\$ 28	\$ 61	\$ 32	\$ 72	\$ 54
AOI	\$ 65	\$ 68	\$ 3	\$ 36	\$ 65	\$ 42	\$ 133	\$ 80
Notable Items (Not Trendable) Included within AOI [(unfavorable)/favorable]								
Legacy incentive compensation (a)	—	—	—	—	—	(1)	—	(2)
Project expenses (b)	(3)	—	—	—	—	—	—	—
Single premium immediate annuities ("SPIA") mortality & other reserve adjustments (c)	5	8	(2)	1	(2)	2	13	(3)
Assumption review & DAC, VOBA and DSI unlocking (d)	—	—	(9)	4	21	—	—	—
Bond prepay income / other (e)	4	—	—	—	2	—	1	—

(a) Change in certain long term incentive compensation costs, including the change in the liability for our FGLH stock compensation plan, which as a liability plan, is settled in cash and accounted for at fair value each reporting period (Predecessor only).

(b) Expenses associated with project related expenses.

(c) The release of annuity reserves associated with mortality of annuitants, which varies due to timing, volume and severity of experience, and other reserve adjustments.

(d) Reflects unlocking from updating our DAC, VOBA and DSI amortization models for actual experience and equity market fluctuations. Also, annually in the 3rd calendar quarter, we complete our Annual Assumption Review & Unlocking process by adjusting our valuation assumptions to align with actual experience.

(e) Bond prepayment income, changes in tax valuation, and other allowances related to reinsurance and agent debt, reinsurance settlements and other net favorable activity.
